

EUROTOOL® FRICTION BALL CASE OPENER

CWR-779.00

Open screw-off case backs with ease using the EURO TOOL Friction Ball Case Opener. Simple to use and will not leave marks. This ball is approximately 2.5" in diameter and works best when not fully inflated. If you wish to adjust hardness, simply use *hand pump and standard inflating needle* (not included) to add air or let air out. **TO USE:** Grip ball tightly between fingers, press firmly against watch back and twist counterclockwise to open and clockwise to close.

Caution: Do not over inflate or ball will break.
